

Weekly Log
Week commencing 4/02/2013

06/02 Notes

- PPR complete and handed in
- Java Programming started
- Developing class to deal with csv file and populate a matrix
- Research on BufferedReader etc to complete class
- Data Sets re-organised into suitable csv files
- No meeting with supervisor this week. Meeting re-scheduled to 14 Feb.

Planned work for the week - To program the setup for time series analysis.

07/02 notes

- Library used to deal with CSV files. OpenCSV
- To attend workshops on Friday to talk to Witness Care Teams to discuss obtain ideas for the surveys
- To research which algorithm or data mining model to use on data when setup in java. Looking at Rapid Miner for inspiration
- To research whether time series data for forecasting should be of similar type. Eg all Monday data to predict a forecast a Monday, all January data to forecast a January. And also the amount of months or days to take into account when predicting.
